COVID-19

Close Connection Between Infectious Diseases and Fever

According to clinical studies, 28 infectious diseases have premature fever symptoms

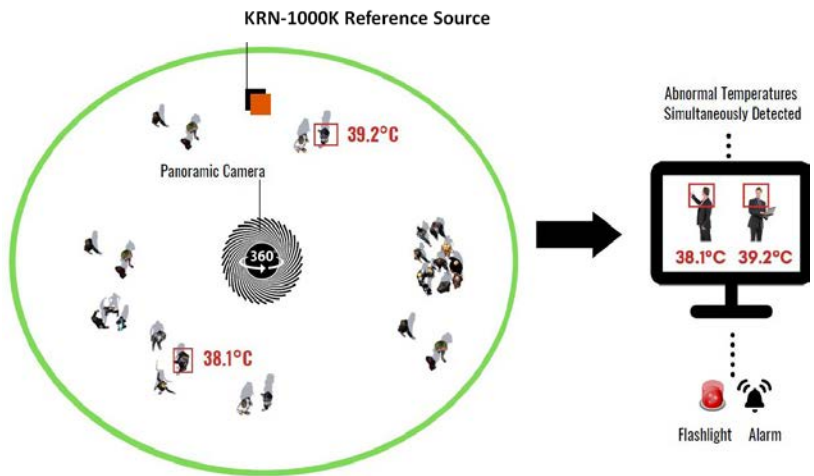

Fever temperature measurement is the best way to track and trace patients to prevent epidemics.

Principles for Preventing and Controlling Infectious Diseases

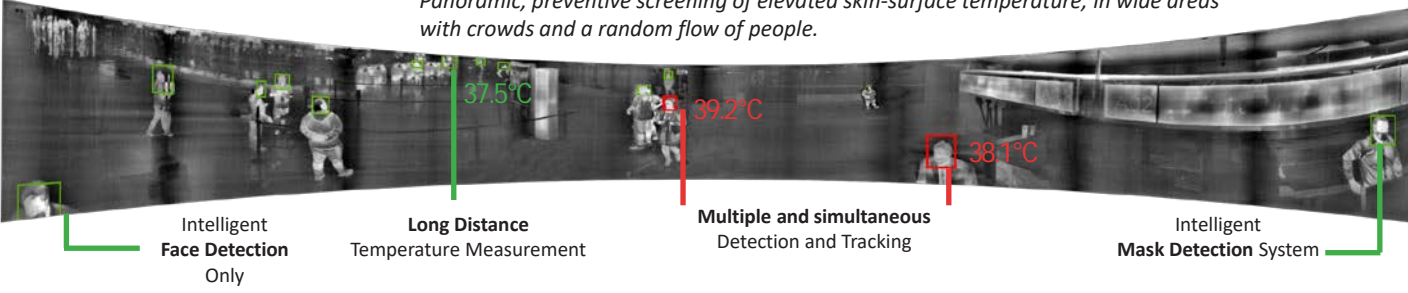

Panoramic Fever Screening

The unique **panoramic** screening technology of **AI Tech** captures and checks multiple people with fever, on the fly, wherever they are, whatever their posture within a **1000 sq.m. area**.

Panoramic, preventive screening of elevated skin-surface temperature, in wide areas with crowds and a random flow of people.
